

# MISSISSIPPI CHILDREN'S MUSEUM MERIDIAN

MERIDIAN, MISSISSIPPI

## *Meridian's 'My Fantastical Backyard'*

- Designed play structures to integrate with the museum's inspiring theme
- Created brightly colored pieces that would stand out
- Crafted all structures using kid-tough, weather-resistant materials

### **Challenge:**

The new museum in Meridian, MS wanted to create a space that would inspire imaginations, but would also provide shade and relaxation. The space would need durable structures that could offer children an opportunity to engage with each other and improve social skills.

### **Solution:**

Our team crafted the perfect hang out spot for when it gets too hot. Imagine a 7 foot tall Lily Pad shade cover. It has a 6 foot wide, bright green lily pad resting atop a slightly curved "stem". Little ones can sit in the shade on the matching lily pad stools underneath. Each stool is 1 foot tall and painted bright green to match the shade. We also made a bright pink Mushroom House and Sky Blue Acorn for children to play hide-n-seek in.

# MISSISSIPPI CHILDREN'S MUSEUM MERIDIAN

MERIDIAN, MISSISSIPPI

## Result:

Each piece was crafted using either glass fiber reinforced concrete (GFRC) or glass fiber reinforced polymer (GFRP). Both materials are durable, low maintenance, and will keep their vibrant colors for many years—even under the Mississippi sun.

The museum's My Fantastical Backyard's structures create a memorable, interactive playland where little ones can run, play and let their imaginations run wild.

## Next Step:

No matter what your vision looks like—whether it's fairytale forests or prehistoric beasts—The 4 Kids will make it happen. [Contact us](#) for a free initial consultation.
