

CITY OF CEDAR KEY

CEDAR KEY, FLORIDA

Cemetery Point Park

- Provided a T-Rex Skull sculpture for the park in Cedar Key
- Beautiful and realistic piece of playground art for children to enjoy
- Constructed the climber using material resistant to fire & natural disasters

Challenge:

As part of the Florida's Nature Coast Conservancy, the City of Cedar Key asked us to design a sculpture that would appeal to all of the locals and tourists. The city continues to grow and develop their recreational areas by providing trails, picnic areas and playgrounds.

Solution:

To meet the customer's request, we crafted a T-Rex Skull sculpture based on a real T-Rex skeleton. The skull was made using glass fiber reinforced concrete (GFRC) and filled to add weight and strength. This material is durable, long-lasting and environmentally friendly.

CITY OF CEDAR KEY

CEDAR KEY, FLORIDA

Result:

Standing out, the prehistoric sculpture is sure to add to the beauty of this local park. Anyone visiting won't be able to resist stopping to check it out and take a few photos. Kids love the realism and that they get to climb a dinosaur head. Parents appreciate the safety aspect and park attendants love the low maintenance this piece requires. It is a stunning piece for all to enjoy.

Next Step:

When it comes to keeping parks beautiful, we are here to help by providing unique, custom made art. We provide sculptures that are safe for the environment and don't require harsh chemicals for cleaning. Let us create something beautiful and strong for you.
