

FIRST FIVE SOLANO

VALLEJO, CALIFORNIA

Whimsy and Nature

- Created 13 whimsical, nature themed sculptures
- The play equipment is made using realistic textures for sensory play
- Engineered custom structures with durable materials that stand up to the elements

Challenge:

First Five Solano is a facility that helps families with all aspects of life. Moms and dads bring their children with them, but need something to keep them entertained while taking care of business. The director of First Five called us wanting something fun and whimsical for young children to enjoy

Solution:

Our artists sculpted thirteen beautiful sculptures, small and large. Two towering mushrooms at the entrance with a matching mushroom house to play in, two acorn crawlers, three stump steppers with a leafy balance log, three ladybugs and a rustic bridge to run and jump on.

FIRST FIVE SOLANO

VALLEJO, CALIFORNIA

Result:

These beautiful sculptures will last for many years of enjoyment and many children's visit. We used smart-crete, glass fiber reinforced concrete (GFRC), to create climbable sculptures for little ones to enjoy. The material is low maintenance, making it an ideal choice for any setting.

Next Step:

The 4 Kids play equipment is custom designed and crafted of environmentally safe and virtually maintenance free materials, the obvious next step for park planners is to contact us for a consultation. Our team will help custom design the perfect playscape to fit your needs.
