

KALEA BAY

NAPLES, FLORIDA

Adding A Bit Of Decor For The Residents Of Kalea Bay

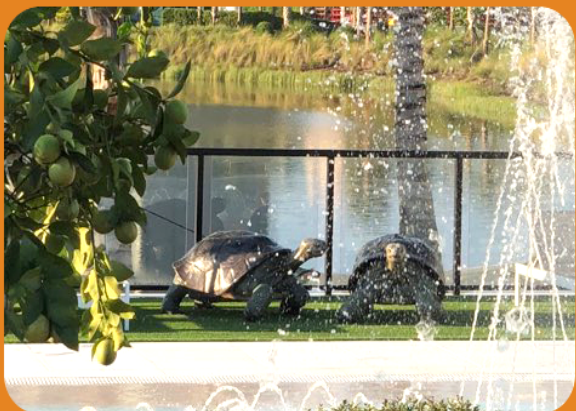

- Created 2 nature themed sculptures
- The play equipment is made using realistic textures for sensory play
- Engineered custom structures with durable materials that stand up to the elements

Challenge:

The owners of Kalea Bay, a residential sky rise in Naples, Florida, wanted something special for their residents. They asked for a couple of pieces to add a bit of décor to their pool side.

Solution:

Now, sitting by the side of the pool are two beautifully sculpted tortoise sculptures. The tortoise was made with glass fiber reinforced concrete (GFRC) and filled to add weight and strength. This material is durable, long-lasting, and earth friendly. We also gave it a coat of anti-graffiti to help against future acts of mischief.

KALEA BAY

NAPLES , FLORIDA

Result:

These beautiful sculptures will last for many years of enjoyment and many children's visit. We used smart-crete, glass fiber reinforced concrete (GFRC), to create climbable sculptures for little ones to enjoy. The material is low maintenance, making it an ideal choice for any setting.

Next Step:

The 4 Kids play equipment is custom designed and crafted of environmentally safe and virtually maintenance free materials, the obvious next step for park planners is to contact us for a consultation. Our team will help custom design the perfect playscape to fit your needs.
