

SPOTTER'S TRAIL

JACKSON , MISSISSIPPI

A Trail of Fun and Learning

- Custom Slide for Climbing, Crawling, Sliding & Exploring Adventures
- Created using GFRC, a resilient, low-maintenance material
- Engineered a unique structure to blend perfectly with the natural environment

Challenge:

Designing something that seamlessly combines education and fun to capture children's interest is a significant challenge in itself. Designing a climber that provides multiple activities adds another challenge, but one we jump at! The team at the Mississippi Children's Museum in Jackson tasked us with creating just that.

Solution:

When it comes to fun, nature, exploration and education, we challenged ourselves to making something that everyone would enjoy. Using glass fiber reinforced concrete, an architectural material, we created an engaging structure.

SPOTTER'S TRAIL

JACKSON , MISSISSIPPI

Result:

Nestled along Spotter's Adventure Trail stands the newest feature: The Log Climber and Slide. This climber replicated the appearance of an actual log, with textured GFRP which mimics the natural look and feel of tree bark. Despite its appearance, the surface is smooth ensuring a safe climbing experience for children. Kids will have a blast crawling through the hollow log, or climbing up and sliding back down.

Next Step:

Any color, any size, any texture...The 4 Kids will turn your themed playground idea into a reality. [Contact our team](#) for a free initial consultation –we'll transform your museum, playground, or athletic facility into a place where visitors make memories.
