

NORTH IMAGE PARK

VANCOUVER, WASHINGTON

Dinosaurs Stomping in the Park

- Provided several prehistoric themed pieces
- Beautiful and realistic piece of playground art for children to enjoy
- Made with weather-resistant, kid-tough material

Challenge:

The Landscape Architect contacted us requesting something special for the new park in Vancouver. The city had something special planned; they wanted it to be large, fantastic and have that wow factor. The plans were awesome, so we knew we had to jump right in.

Solution:

To meet the customer's request, we crafted several prehistoric themed pieces to fit the bill. There is a large nautilus shell at the entrance, dinosaur bone benches, a baby triceratops, [stegosaurus](#), and a [hatched t-rex](#). Kids will have a blast running around and touching every dinosaur they can. They can even look up to see the [pterodactyl](#) 'flying' overhead.

NORTH IMAGE PARK

VANCOUVER, WASHINGTON

Result:

Families will now have an exciting, prehistoric-sized time playing. Parents can relax on the [DinoBonz benches](#) and watch their children as they play with a [baby Triceratops](#), safely. This dino-rific playground definitely adds the right amount of wow the city was going for.

Next Step:

Whether you need one Wow! play structure or an entire playground, we have the know-how to manage your special project, from conceptual drawings to installation. [Contact The 4 Kids](#) to learn more about our kid-tested, kid-approved play structures.
