

San Gabriel Park Creative Playscape

GEORGETOWN, TEXAS

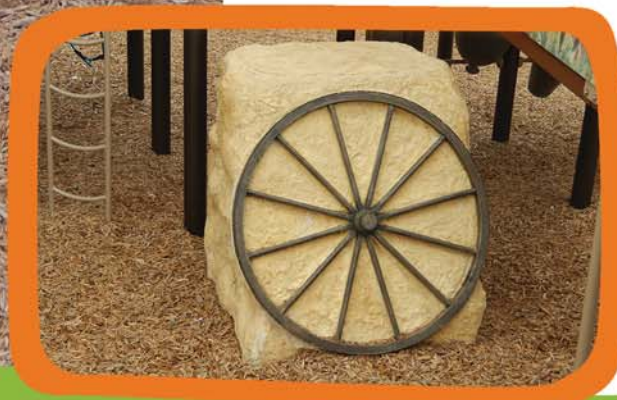

San Gabriel Park Creative Playscape

Community heritage and kid-approved fun combine in detailed playscape

- Designed play structures reflecting the community's heritage & history
- Crafted highly detailed climbers, including an 8' boulder & a realistic teepee
- Engineered the custom play structures with weather-resistant, Texas-tough materials
- Replaced outdated equipment with structures meeting federal & state compliance guidelines

Challenge:

Faced with replacing a wooden play structure that no longer complied with accessibility guidelines, the City of Georgetown, TX launched a renovation project to update the playground and pay tribute to the community's rich heritage. The project called for structures that were safe, accessible, and highly detailed.

San Gabriel Park Creative Playscape

GEORGETOWN, TEXAS

Solution:

The 4 Kids team designed and crafted modern equipment that integrated aspects of Georgetown's heritage. We built play structures representing different eras, including the community's Native American cultures and its settlement period. Custom pieces include:

- 8' Climbing Boulder
- Calf Climber
- Wagon Wheel Climber
- Teepee Climber
- Hay Bale Climber

Despite their old-timey feel, each custom play structure is constructed to meet all necessary compliance standards. Each piece was crafted with durable materials, like glass fiber reinforced concrete (GFRC) or glass fiber reinforced polymer (GFRP), to maintain function and appearance no matter what kind of weather the Texas climate dishes out.

Result:

The Creative Playscape is now a safe, accessible place for kids to play and imagine as well as learn about their community's rich heritage.

Next Step:

What's your vision? Let our team create a playscape or playground for your park, zoo, museum, school, church, or athletic facility. Contact The 4 Kids—the initial consultation is free.
