

Sign 10

This unique signage structure from The 4 Kids includes simple two sets of stacked blocks flanking the text area of the sign, ideal at entrances to identify company locations, at theme parks to welcome visitors, or to provide directional information for universities, libraries, shopping malls, even ballparks and military installations. The possible locations for this exceptional sign display are endless, from schools to shrines, daycare centers to senior centers, restaurants to rest areas and hundreds more. The first opportunity to make that important first impression, proper signage is vital and the experts at The 4 Kids produce superior designs that inspire a level of trust for property owners who depend on quality as well as good looks. Requiring virtually no maintenance in all weather conditions, the sign structure is crafted with glass fiber reinforced concrete, known in the industry as the smart concrete for its superior finish and durability, which even resists damage from sea salt spray. Available at 3,4,5 and 6 feet tall, the structure can also be mounted on a sturdy brick base for an extra foot and 3 inches of height.

The 4 Kids was born out of a desire to create high quality, one-of-a-kind park shelters and play environments that effectively appeal to children's natural curiosity and imagination.

All of our products are custom designed to work perfectly with your unique playground. Let us know how we can meet your specific needs by contacting our knowledgeable design specialists, today.
