

## Sign 6

Clean lines and varied shapes create an attractive design for supporting important signage for every location as part of this amazing The 4 Kids sign structure from the experts in their Greenville, Texas studios. Making sure that customers at the mall, patients at the physician's clinic, children at the zoo, the ball park, or school, or even members of the public at government buildings are properly welcomed and clearly informed, this superior sign design is not only functional, but high quality. Made to withstand everything the weather can throw at it, this superior sign structure is virtually indestructible with very little maintenance for years of service in rain, snow, ice, intense heat and even the salt spray from the sea. Constructed with the "smart" concrete, glass fiber reinforced concrete, this customized sign structure design comes in heights of 3, 4, 5 or 6 feet with another one foot and three inches for sign supports that are mounted on an attractive brick base. From hospitals to hotels, shopping centers to day care centers, courthouses to colleges and everything in between, The 4 Kids sign structures are far superior to others.

The 4 Kids was born out of a desire to create high quality, one-of-a-kind park shelters and play environments that effectively appeal to children's natural curiosity and imagination.

All of our products are custom designed to work perfectly with your unique playground. Let us know how we can meet your specific needs by contacting our knowledgeable design specialists, today.
