

## TÜV SÜD America: Helping Manufacturers Get to Market

TÜV SÜD America provides certification and safety testing services to clients around the world. The B2B firm's motto is "Choose certainty, add value." The company is focused on ensuring the security of new products being released on the market. However, safety is not the only area that TÜV SÜD America works on with manufacturers. The firm also helps customers figure out how to improve their products without compromising on cost and sustainability. With the help of TÜV SÜD America, manufacturers and product companies are able to create their products faster and more efficiently, which benefits everyone, including the end user.

The 4 Kids playground equipment designs are carefully created to meet safety standards like those that TÜV promotes and to ensure that only the highest quality products are manufactured. We aim to create play equipment that will draw children and encourage them to climb, play, and explore their world, but it is just as important to us to give children a safe place to do this. Our products are built to last and to hold up under constant use, without chipping or splintering. When you choose our playground equipment or shelters, you are choosing quality.
